

HARIPRASATH V

Backend Developer | Python | Django | Django REST Framework

Chennai, India • +91 9585586843 • <mailto:hariprasath642@gmail.com> • <http://www.linkedin.com/in/hariprasath27> • https://hariprasath2707.github.io/Backend_profile_2026/

PROFESSIONAL SUMMARY

Python Backend Developer with 1+ year of experience in backend web development using Django and Django REST Framework (DRF). Skilled in RESTful API design, relational database management (PostgreSQL, MySQL), SQL query optimization, JWT-based authentication, and third-party API integration. Adept at building secure, scalable, and maintainable server-side applications. Experienced with Git version control and agile methodologies. Passionate about writing efficient backend solutions and continuously improving application performance.

WORK EXPERIENCE

Backend Developer | Emayam Technology

March 2025 – Present | Chennai, India

- Designed and developed scalable RESTful APIs and backend systems for Focult, an enterprise SaaS platform, using Python, Django, and Django REST Framework, supporting employee monitoring, productivity analytics, and compliance reporting modules.
- Built dual-component Windows Agent applications (Login Agent and Background Service Agent) in Python for secure authentication, device registration, and silent real-time activity monitoring and data sync with backend APIs..
- Implemented JWT-based authentication and Role-Based Access Control (RBAC) across multi-tenant organizational hierarchies, and optimized MySQL/PostgreSQL queries, reducing average response times by ~35%.
- Led a team of 4 developers and mentored 2 junior engineers while implementing Celery-based asynchronous task processing for scheduled jobs, reports, and notifications within an Agile development workflow.

CORE SKILLS

Languages & Frameworks: Python, Django, Django REST Framework (DRF), RESTful APIs.

Databases: MySQL, PostgreSQL, Serializer-Based Development.

Backend Expertise: API Integration, Workflow Automation, RBAC, JWT, Celery, Performance Optimization.

Tools: Git, GitHub, Postman, VS Code.

PROJECTS

Focult – Employee Monitoring Platform *Stack: Django, PostgreSQL, DRF, JWT, Python, Celery, Git*

- Developed RESTful APIs and backend modules for real-time employee monitoring, covering web history, application usage, keystrokes, screenshots, screen recording, and file transfers across 500+ endpoints.
- Designed optimized PostgreSQL schemas for large-scale data ingestion and implemented Celery for automated exports and scheduled reports, reducing manual effort by approximately 60%.
- Built JWT-based authentication and Role-Based Access Control (RBAC) for admin and employee roles, ensuring low-latency processing, data privacy, and scalable architecture.

Neem – E-Commerce Platform *Stack: Django, PostgreSQL, DRF, Python, Git*

- Developed RESTful APIs for product catalog management, inventory tracking, order processing, customer management, and payment workflows.
- Implemented JWT-based authentication and role-based authorization (RBAC) for secure access management across user roles.
- Built real-time inventory management modules to track stock availability and product updates.
- Optimized database schemas and API performance, reducing average response times by approximately 35%..

EDUCATION

Master of Computer Applications (MCA)

2022 – 2024

Srinivasan College of Arts and Science, Perambalur | CGPA: 7.2

Bachelor of Computer Applications (BCA)

2019 – 2022

Srinivasan College of Arts and Science, Perambalur | CGPA: 7.2

Python Full Stack Development

Jul 2024 – Dec 2024

Besant Technologies (Course + Internship)
