

HARIPRASATH V

Backend Developer

Chennai, India • +91 9585586843 • <mailto:hariprasath642@gmail.com> • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Backend Developer with nearly 1 year of experience specializing in Python, Django, RESTful API development, and database optimization. Proficient in building scalable, secure, and maintainable backend systems, integrating third-party services, and optimizing application performance using MySQL and PostgreSQL. Experienced in enterprise application development, project coordination, and delivering high-quality solutions within tight deadlines. Adept at problem-solving, system design, and collaborating with cross-functional teams to create reliable software that drives business growth and enhances user experience.

WORK EXPERIENCE

Backend Developer | Emayam Technology

March 2025 – Present | Chennai, India

- Built and maintained RESTful APIs and backend systems using Python, Django, and DRF; managed MySQL and PostgreSQL databases with schema design and query optimization — reducing average query response time by ~35%.
- Implemented JWT authentication, RBAC, Celery-based task queues, and performance-optimized modules serving 2 enterprise-level applications.
- Led a team of 4 developers — managed sprint planning, project lifecycle, and stakeholder communication, ensuring on-time delivery across all milestones.
- Conducted code reviews and mentored 2 junior developers on Python, Django, and API best practices, improving team code quality scores.

CORE SKILLS

Languages & Frameworks: Python • Django • Django REST Framework (DRF) • RESTful APIs

Databases: MySQL • PostgreSQL • Database Design • Query Optimization • Serializer-Based Development

Backend Expertise: API Integration • Workflow Automation • Audit Logging • RBAC • JWT • Celery • Performance Optimization

Tools: Git • GitHub • Postman • VS Code

PROJECTS

Focult – Employee Monitoring Platform Stack: Django, PostgreSQL, DRF, JWT, Python, Celery, Git

- Developed RESTful APIs and backend modules for real-time employee monitoring — covering web history, app usage, keystrokes, screenshots, screen recording, and file transfers for 500+ endpoints.
- Designed optimized PostgreSQL schemas for large-scale data ingestion; implemented Celery for automated exports and scheduled reports, cutting manual effort by ~60%.
- Built JWT authentication and RBAC for admin and employee roles; focused on low-latency processing, data privacy, and scalable architecture.

Nex Liv – Real Estate Platform Stack: Django, PostgreSQL, DRF, Python, Git

- Built backend for an online real estate platform enabling property buying/selling with dynamic listings and user management, supporting 10+ property categories.
- Implemented a fully dynamic forms and fields system allowing configurable property attributes without schema changes — reducing release cycle time for new property types.
- Developed RESTful APIs for property search, filtering, and listing management with a scalable, maintainable architecture.

EDUCATION

Master of Computer Applications (MCA)

2022 – 2024

Srinivasan College of Arts and Science, Perambalur | CGPA: 7.2

Bachelor of Computer Applications (BCA)

2019 – 2022

Srinivasan College of Arts and Science, Perambalur | CGPA: 7.2

Python Full Stack Development

Jul 2024 – Dec 2024

Besant Technologies (Course + Internship)
